

Asbury Carbons Shelf-Life Statement

Monday, October 6, 2025

Shelf-Life of Carbon, Carbon Fibers, Calcined Cokes and Graphite Products:

The calcined petroleum coke, calcined pitch coke, metallurgical coke, carbon black, carbon fiber, oxidized PAN fiber, and natural and synthetic graphite products provided by Asbury Carbons have an indefinite shelf life.

The above statement is valid for any product stored in its original packaging. As with any substance, during storage in environments where the relative humidity is high it is possible that some slight moisture pickup will occur. However, these products are not soluble or reactive with water and will retain their properties. Reference the applicable Safety Data Sheet (SDS) for specific Handling and Storage requirements.

Carbon, calcined coke, carbon fiber, and graphite products are chemically stable, insoluble, and have no vapor pressure. These materials are not affected by long-term storage under reasonable environmental conditions.
